

Ok JP,

I tried again this evening. I tried from 2 different Apple devices: same thing on both. It says my cart is empty, I fill up my cart and as I'm doing so it shows my original request and multiplies quantity. Then when I go to check out it tells me my cart is empty.

So I went to my trusty android devices, trying again from 2 different pieces of equipment. On the left if I click on "on line store" I receive an error message that says it is not available. If I go to yarns, I am able to put things in my cart....but it also is picking up the things I selected on my apple devices and it will not allow me to reduce quantities.
