P.S. follow up. Sorry, seems to be a glitch with the web site order form-----or perhaps at my end.

After filling in all required info, address details and log-in password (ginger), I was dumped out around 4 times. Each time my basket listed the "new" kit (4 xs \$77) but when I attempted access to "my basket", it was "empty".

Computers are our friends I know, but sometimes they are whiny.
So here's the info I am sending you directly here.
